VACUUM METALISATION

The benefits

- Consistent High Quality
- Maximum Productivity
- Commercial Benefits

Using specialised plant, unique to ourselves and with the latest technology, allows us to process difficult products to very tight specifications. Our modular design gives us the ability to configure the most economical process plant route for a wide range of jobs.

Our process plants are designed to take products in a wide range of packaging. We specialise in developing, with our customers, the next generation of products from the laboratory stage through to full scale production. If you have a unique process requirement we will work with you to come up with a solution to go forward.
